## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2 and 4-6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mitchell et al. (US Patent 5,460,771) in view of Lupke (US Patent 5,405,569). Mitchell et al. teaches the basic method and apparatus as claimed (see column 13, line 14-column 14, line 46). Mitchell et al. does not teach that the tubing has a circumferential rib and external first groove as claimed in the instant claims. Lupke teaches a method and apparatus for forming corrugated tubing which does have an internal ridge and external groove (16, 31, and 87) (column 2, lines 60-68). It would have been obvious to a person of ordinary skill in the art at the time of the invention to use the method and apparatus taught by Lupke to further define the method and apparatus taught by Mitchell et al. in order to form tubing with ends which are more easily secured to other parts.

### ***Allowable Subject Matter***

3. Claims 3 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Martin et al. (US Patent 5,251,916) and Hegler et al. (US Patent 5,511,964).
